

HIS AND HERS

Created By Chris Horne, Amscan International Limited.

Simple but elegant, this pair of columns would be perfect for the head table at a wedding. Also great for the entrance, the cake table, or indeed just about anywhere!

Product Required:

- 6 x 19" Anagram Decorator Curves, Silver: (1630199)
- 6 x 9" Lilac foil hearts (1667699)
- 6 x 4" Lilac foil hearts (1665999)
- 1 x Wedding Dress Supershapes (1590501)
- 1 x Tuxedo Supershapes (1801501)
- 2 x silver double heart balloon weights (11711-18)
- Balloon Bond
- Cable Ties

Construction Method:

1. Inflate the 6 silver curves with helium (They won't float, but this reduces the weight on the Supershapes balloons).
2. Attach two of the curves to the weights by passing the tail through the loop on the top of the weight, and securing with a cable tie.
3. Create two chains of 3 curves each by joining them together with cable ties. Overlap the balloons by about an inch (2.5cm) and pull the cable tie tight around the overlap.
4. Helium Fill the Wedding Dress Supershapes and attach it to the top of one of the chains of curves using a cable tie. Do the same with the Tuxedo and the other chain.
5. Inflate all the 4" and 9" hearts with air and heat seal them. Roll and tape the tails to make them neat.
6. Attach the hearts to the silver curves using small pieces of Balloon Bond, as shown in the pictures, to create a pair of columns.

Estimated Labour time: 20 minutes for the pair.

To comply with California Law, the entire design can be air-filled and suspended from above on monofilament line.
