Construction Method:

1. Inflate all of the 4" and 9" balloons with air, heat seal them and tape the tails neatly with clear tape.
2. Inflate 1 x 42" curve and 1 x 26" crescent with helium. Hold the tails together and secure with a cable tie. Add ribbon, folding the tails neatly to hide them, and secure to the weight.
3. Use Balloon Bond to secure the crescent to the curve - to hold it in position.
4. Use small pieces of Balloon Bond to secure 4 of the 4" stars and 2 of the 9" stars to the curve and crescent, as desired.
5. Repeat steps 2, 3 and 4 to create a second ensemble and complete the design.

This design can be air filled and suspended from above to comply with California Law.

For a design with a little less impact, simply use one ensemble per weight instead of two....

Estimated Labour time: 15 minutes.
