

BABY BOY MARQUEE

Created By Chris Horne, Amscan International Limited.

Constructed very quickly, with the minimum of materials, this design is great as a gift delivery or for décor at a baby shower.

Product Required:

- 2 x 28" Anagram Decorator Curves, Pastel Blue: (1635599)
- 3 x 9" Blue foil stars (1623899)
- 2 x 4" Pastel Blue foil hearts (1636599)
- 1 x Baby Boy Marquee Supershape (1581501)
- 1 x blue star balloon weights (117800-01)
- Balloon Bond
- Cable Ties

Construction Method:

1. Inflate the 2 Pastel Blue curves with helium (They won't float, but this reduces the weight on the Supershape balloon).
2. Inflate the 9" and 4" stars with air and heat seal them.
3. Attach one of the curves and a 9" Star to the weight by passing both the tails through the loop on the top of the weight, and securing with a cable tie.
4. Hold the necks of the second curve and the remaining 2 x 9" stars together, fold them in half, and secure all three to the top point of the first curve using a cable tie.
5. Helium Fill the Baby Boy Marquee Supershape and attach it to the top of the second curve using a cable tie.
6. Roll and tape the tails of the 4" stars to make them neat. Attach them to the design with small pieces of Balloon Bond: one at the joint between the two curves, and the other at the base of the Marquee.

7. **Estimated Labour time: 10 minutes.**

To comply with California Law, the entire design can be air-filled and suspended from above on monofilament line.
