

CHRISTMAS TREE WITH ELVES

Created By Chris Horne, Amscan International Limited.

Around 8 feet tall and, because it's air-filled, VERY long lasting, this elegant tree is perfect for hotels, shopping malls, window displays and much more...

Product Required:

- 6 x 35" Anagram Decorator Crescents, your colour choice
- 6 x 26" Anagram Decorator Crescents, colour as above
- 12 x 17" Anagram Decorator Crescents, colour as above
- 6 x 10" Anagram Decorator Crescents, colour as above
- 1 x 9" Anagram Foil star
- Around 20 x 4" Anagram foil stars
- 5 x 3398701 Sitting Santa MultiBalloon
- Balloon Bond
- Small cable ties

Construction Method:

1. Inflate all the balloons with air. The 10" Crescents, 9" Star and 4" Stars will need to be heat sealed, the rest have valves.
2. Cable tie 3 x 35" crescents together at the necks, then secure them together with pieces of Balloon Bond.
3. Create another cluster of 3 x 35" crescents in the same way, then place on top of the first cluster, positioning the balloons above and between those of the first cluster. Secure in place with Balloon Bond.
4. Add 2 x clusters of 26" crescents, then 2 x clusters of 17" crescents and finally 2 x clusters of 10" crescents in the same way.
5. Using small pieces of Balloon Bond, secure the balloons to each other where necessary to keep the shape of the tree.
6. Finally, decorate the tree by attaching (with balloon bond) the 4" stars all over and the elves where desired.

Estimated Labour time: 90 minutes.

TIP: If created in Gold, Silver or Holographic balloons, and suspended upside down from a high ceiling, this is a STUNNING chandelier...
