

Satin Heart Centrepiece

Simple and Highly Adaptable

Designed By Chris Horne

Product Required:

- 1 x Anagram Pastel Lilac Satin Luxe Heart Balloon (3992401)
- 10 x 5" Satin Lilac Sempertex Balloons (20002019)
- White Tulle Spool (340053-08)
- Lavender Curling Ribbon
- 1 x Small Weight

Estimated Labour time: 10 Minutes

Construction Method:

1. Create a 4-balloon cluster of 5" latex balloons inflated to 3.5". Tie the small weight into the centre of the cluster.
2. Create a 4-balloon cluster of 5" latex balloons inflated to 3". Tie to the top of the first cluster by pulling the neck of one of the 3.5" balloons up through the middle of the cluster and wrapping around several times.
3. Inflate the Satin Luxe heart with air, and secure tightly into the cluster base by wrapping the neck around and through the middle of the clusters several times.
4. Cut approximately 1 metre of tulle from the spool and pull through the cluster base at the bottom of the heart so that an equal length is on each side. Take both ends up to the top of the heart and tie at the top. Do the same with a length of Lavender curling ribbon.
5. Make two small bows of white tulle tied with lavender curling ribbon. Tie one at the top of the heart and one into the base as shown.
6. Inflate 1 x 5" latex balloon fully, then deflate it until it measures approx. 2". Tie off, then twist the balloon into two small bubbles. Repeat with the last 5" balloon and twist the two together to make a small cluster of 4 bubbles. Attach to the top of the design using one of the curling ribbon ends, wrapping it through the small cluster.
7. Trim any excess tulle and curl the curling ribbon ends.

There are co-ordinating Sempertex latex balloons for all of Anagram's Satin Luxe hearts, there are many available colour combinations.

Your design can be further enhanced with the addition of helium filled balloons above.
