

ORBZ AND CRESCENT CENTREPIECE

Created By Chris Horne, Amscan International Limited.

This contemporary and stylish design works well as a centrepiece and is very quick and simple to assemble.

Product Required:

- 1 x Silver Anagram Orbz: (2820199)
- 2 x 17" Gold Crescents: (1613399)
- White balloon ribbon
- 1 Silver Star Balloon Weight: (117800-18)

Construction Method:

1. Inflate both of the 17" Crescents with Air.
2. Inflate the Orbz Balloon with Helium, using a latex balloon inflator. Be sure to use the Inflation Gauge included with the balloon to ensure correct inflation.
3. Attach the tail of the Orbz balloon to the tail of one of the Crescents using ribbon, or a small cable tie. Make sure that both tails are folded and tidy.
4. Attach the lower tip of the first crescent to the tail of the second crescent in the same manner - use the image on the left as a guide.
5. Tie the balloon ribbon to the tip of the lowest crescent, then to the balloon weight.

Estimated Labour time: 5 minutes.

As Anagram Orbz and Crescents are available in wide range of colours, this design can be adapted to suit every occasion!
