

CRESCENT AND HEART SCREEN

Created By Chris Horne, Amscan International Limited.

An elegant, yet simple wall, backdrop or screen - or for use as a space divider... The reflections add interest and excitement!

Product required (to re-create as in photo):

- 20 x 26" Anagram Decorator Crescents, Silver: (1629899)
- 6 x standard Metallic Blue Anagram Foil Hearts (1059202)
- 4 x Blue Foil Weights (991365-01)
- Balloon Bond
- Cable ties

Construction Method:

1. Inflate a 26" crescent with helium, and attach the point furthest from the tail to a weight using a cable tie.
2. Inflate a second crescent with helium and using a small cable tie, attach the point furthest from the tail to the tail of the first balloon. Ensure that it faces in the opposite direction.
3. Continue adding helium filled crescents until the chain is 5 balloons high. Always use the point furthest from the tail, and attach them so they face in alternated directions.
4. Make 3 more identical chains, as above.
5. Place the chains side by side, alternating the directions in which they face. Use the photo for reference.
6. Where two crescents from neighbouring chains touch back to back, fix them together with small pieces of Balloon Bond.
7. Inflate the standard hearts with helium, tape up the tails, and fix them in place as shown in the photo using 2 small pieces of Balloon Bond for each balloon.

Estimated Labour time: 20 minutes.

TIP: This screen can be made as large as required, and works equally well if air filled and suspended from above.
